Key Measures

Patent Analysis of Mask Production Facilities

Patent Analysis of Mask Production Facilities

- Driven by the need for mask production facilities at home and abroad
- TIPO's analysis of global patent applications involving mask production facilities helps manufacturers better understand overall patent portfolios and avoid potential patent infringement.
- TIPO also provides consulting services for individual manufacturers.

Patent Information on Clinical Trials of Drugs

- We use COVID-19 clinical trial data registered in the United States Clinical Trial Database (http://clinicaltrials.gov/) to sort out and classify experimental drugs according to the scope of patent applications (such as substance, composition, use, and manufacturing method) in our economy.
- For manufacturers' reference to avoid infringing on patent rights
