Procedures to file a request with the Taiwan Intellectual Property Office (TIPO) for Patent Prosecution Highway (PPH) Program between TIPO and the United States Patent and Trademark Office (USPTO) Acting as the Designated Representatives of the Taipei Economic and Cultural Representative Office in the US (TECRO) and the Amerian Institute in Taiwan (AIT)

Amended and enacted on April 1, 2016 The Patent Prosecution Highway (PPH) was established to enable an applicant, whose claims are determined to be allowable/patentable in the Office of First Filing (OFF), to have the corresponding application filed in the Office of Second Filing (OSF) advanced out of turn for examination while at the same time allowing the OSF to exploit the search and examination results of OFF.

The PPH pilot program between TIPO and USPTO acting as the designated representatives of the Taipei Economic and Cultural Representative Office in the United States (TECRO) and the American Institute in Taiwan (AIT) that commenced on September 1, 2011, for a trial period of one year ends 31 August 2012. Evaluations of the pilot program shows that it is effective in expediting patent filing while at the same time significantly reduces administrative costs at the OSF. It is therefore agreed upon by TIPO and USPTO acting as the designated representatives of the Taipei Economic and Cultural Representative Office in the United States (TECRO) and the American Institute in Taiwan (AIT) that this PPH program be a permanent cooperation between the two offices; the official launching date will be on September 1, 2012. Though permanent, the content of the program is subject to change as needed with the development of PPH.

1. Request with TIPO for accelerated examination under PPH

An applicant should file a request for accelerated examination under the PPH with TIPO by submitting a completed "Request for Acceleration Examination Under TIPO-USPTO PPH Program" request form accompanied by the relevant supporting documents. The requirements for filing accelerated examination with TIPO under the PPH are given in paragraph 2. Relevant supporting documentations (paragraph 3) and the procedure for accelerated examination under the PPH program at TIPO is discussed under paragraph 4. The PPH request form is available on TIPO's web site, http://www.tipo.gov.tw/pph.

2. Requirements for requesting accelerated examination under the PPH Program at TIPO

There are four requirements for requesting accelerated examination under the PPH program at TIPO. These are:

(a) The TW application is:

- (i) an application which has validly claimed priority under Taiwan's Patent Act §28 to the US application(s) (Figure A and B in Annex 1 for examples), or
- (ii) an application which has validly claimed priority under Taiwan's Patent Act §28 to the PCT application(s) without priority claim (Figure C in Annex 1 for example).

The TW application which has validly claimed priority to multiple US or PCT applications (Figure D and E in Annex 1 for example), or which is a divisional application validly based on the originally filed application that is included in (i) and (ii) above, is also eligible. (Figure F and G in Annex 1 for examples).

The program is not applicable to utility model applications and design applications.

b) At least one corresponding US application has one or more claims that have been determined to be patentable by the USPTO.

The allowable/patentable claims are (Annex 2 for examples):

- (i) claims indicated in the item "The allowed claim(s) is/are___" in the "Notice of Allowability";
- (ii) claims indicated in the item "Claim(s) ____ is/are allowed" in "Office Action Summary" of either a "Non-final Rejection" or a" Final Rejection".
- (iii) claims indicated in the item "Claim(s) ____ is/are objected to" in "Office Action Summary" of either a "Non-final Rejection" or a "Final Rejection" and where the USPTO examiner indicates that the claims "are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims". Note that when a claim is rejected and the USPTO examiner indicates in the office action that certain features of the allowable/patentable invention have not been claimed and if properly claimed such claim may be given favorable consideration, the suggested and hypothetical claims are not regarded as allowable/patentable in this program.
- (iv) claims indicated in the item "Claim(s) ____ is/are objected to" in "Office Action Summary" of an "Ex parte Quayle Office Action" and where the USPTO examiner indicates that the claims "would be allowable if rewritten or amended to overcome the objection set forth in this office action".

c) All claims on file, as originally filed or as amended, for accelerated examination

under the PPH must sufficiently correspond to one or more of those claims indicated as allowable in the USPTO.

Claims shall be considered sufficiently corresponding where the claims on file are of the same or similar scope as the claims in the USPTO, or the claims on file are narrower in scope than the claims in the USPTO. In this regard, a claim on file that is narrower in scope occurs when a USPTO claim is amended to be further limited by an additional technical feature that is supported in the specification (and/or claims). When possible, the claim on file should be presented in dependent form.

d) The applicant has been notified that a substantive examination will begin shortly. And TIPO has not issued a first examination report on the application.

3. Documents to be submitted for accelerated examination under the PPH program:

Documents (a) to (d) below should be submitted by attaching to "Request for Acceleration Examination under TIPO-USPTO PPH Program". The request form is in Annex 3.

a) Copies of all office action(s) relating to the corresponding USPTO application(s).

The applicant can either provide the office actions with the request for accelerated examination under the PPH program or request that TIPO obtains the documents from the USPTO Public PAIR. The applicant must clearly identify the relevant information (document name and date) of the office actions to be retrieved in the PPH request form. It is noted that applicants must also submit copies of any office action(s) (which are relevant to patentability) from the USPTO application(s) issued after the grant of the request for participation in the PPH program in the TIPO(especially where USPTO might have reversed a prior holding of allowability/patentability). A translation of the office action(s) is not required.

b) A copy of the claims determined to be allowable/patentable by the USPTO.

The claims determined to be allowable/patentable in the USPTO might be either the amendments, or the document submitted at filing, which includes claims determined to be allowable/patentable, or a copy of the USPTO's publication of the granted patent. The applicant can either provide the claims together with the request for acceleration under the PPH or request that TIPO obtains the claims from the USPTO Public PAIR system.

A translation of the allowable/patentable claims is not required; however, the applicant is free to submit translation of the allowable/patentable claims as part of the supporting documentation when requesting accelerated examination under the PPH to allow prompt consideration of the office actions if they so desire.

c) Copies of the references cited by the USPTO examiner

All references cited in "Detailed Action" or "Reason for Allowance" as basis for refusal or allowability/patentability should be provided. However, if the cited reference is a patent document, then submission is not necessary, as they are usually available to TIPO. If TIPO does not access to the relevant patent documents, the applicant must submit these documents at the request of TIPO. If the cited reference is a non-patent literature, the applicant has to submit it.

A translation of the references is not required. TIPO examiner may request translation of cited references using the standard examination procedure when a translation of a cited reference is necessary.

d) A claim correspondence table

The applicant must submit a claim correspondence table which explains the sufficient correspondence of the claims determined to be allowable/patentable by the USPTO and the claims of the TIPO application for accelerated examination under the PPH program.

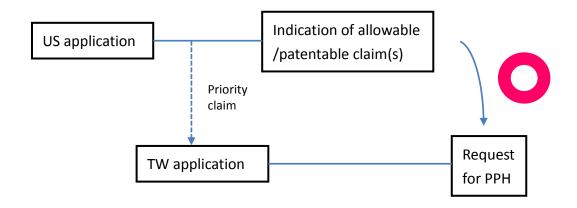

If the claims on file do not sufficiently correspond to one or more claims determined to be allowable/patentable by the USPTO, but the applicant would like to amend the claims to sufficiently correspond to the allowable/patentable clams in the US application(s), the applicant should amend the claims to fully comply with the corresponding terms at the same time as the request for expedited examination under PPH program. The claim correspondence table is given in Annex 4.

4. Procedure for accelerated examination under the PPH Program at TIPO

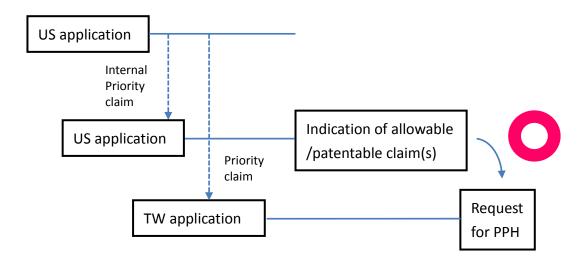

The applicant files a form requesting accelerated examination under the PPH program with TIPO, including relevant supporting documents. If the requirements are met, TIPO will conduct the accelerated examination. If the application does not qualify for participation in the PPH program, the applicant will be notified accordingly and given opportunity to perfect the request. If not perfected, the application will be notified and the application will await action in its regular turn.

The applicant must use the "Amendment Request Form under the PPH Program" (Annex 5) to make amendments during and after the request for expedited examination under the PPH program. Other relevant documents must also be specified in terms of their connection to the request for PPH to ensure prompt and proper processing by TIPO.
